

Program Level Assessment: Annual Report

Program Name (no acronyms):	Computer Science	Department:	Computer Science
Degree or Certificate Level:	BA	College/School:	School of Science and Engineering
Date (Month/Year):		Assessment Contact:	Erin Chambers
In what year was the data upon which this report is based collected?	2022-2023		
In what year was the program's assessment plan most recently reviewed/updated?	2018		
Is this program accredited by an external program/disciplinary/specialized accrediting organization subject to state/licensure requirements?	No		
If yes, please share how this affects the program's assessment process (e.g., number of learning outcomes assessed, mandated exams or other assessment methods, schedule or timing of assessment, etc.)			

1. Student Learning Outcomes

Which of the program's student learning outcomes were assessed in this annual assessment cycle? (Please provide the complete list of the program's learning outcome statements and the SLOs assessed in this cycle.)

This year, assessment was targeted at the following outcomes

PL05: Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.

2. Assessment Methods: Artifacts of Student Learning

Which artifacts of student learning were used to determine if students achieved outcome(s)? Please describe the artifacts in detail, identify the course(s) in which they were collected, and if they are from program majors/graduates and/or other students. Clarify if any such courses were offered a) only at the Madrid campus or c) at any other off-campus location.

CSC 2050/PHIL 3410: A midterm is used to assess student achievement for PL05 "Developing" level in preparation for their final papers and group projects. The group projects are hard to assess at the level of individual achievement, so the first two questions on the midterm are presented as proxies for developing an awareness of ethical principles and their application.

Please describe the actions you are taking as a result of these findings.
In general, the faculty were happy with the results and course content discussed during the meeting. This
