

The matched cases were weighted to the sampling frame using propensity scores. The matched cases and the frame were combined and a logistic regression was estimated for inclusion in the frame. The propensity score function included age, gender, race/ethnicity and education. The propensity scores were grouped into deciles of the estimated propensity scores in the frame and post-stratified according to these deciles.

The final weights were then post-stratified on 2020 presidential vote choice as well as a four-way stratification of gender, age (4-categories), race (3-categories), and education (4-categories). The final registered MO voters was then subsetted to the weighted data likely MO voters, and the weights were trimmed and recentered around 1, to produce the final weights for likely Missouri voters.

POLS047

What is your favorite Major League Baseball team?

- St. Louis Cardinals: 41%
- Kansas City Royals: 33%
- New York Yankees: 2%
- Other Team Chosen: 10%
- Did not have a favorite Major League Baseball team: 76%

By question posed, respondents were asked to select one or more of the following: "The City of Sun County," "The County of Sun County (see Cities and counties)."

Research indicates that high school students need more sleep and later school start times could

help get and thus provide health, academic, and safety benefits. However, some say delaying school start times disrupts the school day for students

and parents, creates transportation issues, and complicates the scheduling of extracurricular

activities (see question).

Should the following be responsible for school Governance (see Cities or counties)?

Should the following be responsible for school Governance (see Cities or counties)?

- Support: 52%
- Oppose: 47%
- Not sure: 20%
